

Education Class Information

EMPOWERING THROUGH EDUCATION

At Software Solutions, Inc., our vision is to provide proper education and training for Business Partners and End Users. Our goal is to significantly reduce the learning curve so that you can become operational and productive with our software as quickly as possible. The more you know about your computer system, the more successful you will be at maximizing the functionality of our software.

Variety of Training Classes - Our current curriculum provides training and education for new to experienced users and from operators to upper management.

Experienced, Knowledgeable Instructors - Our instructors are experienced with our software products in a number of different capacities, not just education. Therefore, they provide insight and techniques learned along the way.

Quality Materials - Using the latest presentation technology, we continually enhance our training materials to include conceptual overviews, standard terminology, procedures, and other helpful tips and techniques.

Personal Attention - Because our classes offer hands-on experience, we limit the class size to provide you with individual attention.

Accelerated Learning - We increase the students' retention by using hands-on exercises, daily procedure training, conceptual overviews, individual attention and helpful tips and techniques.

Listen, Learn & Change - Oscar Hammerstein said it best..."If you become a teacher, by your pupils you will be taught". We listen to your comments and suggestions and continually improve our classes from your input. Questionnaires and surveys are used in class, as well as in our newsletters. We urge you to take a few moments and share your comments with us.

Education Class Schedule

Currently, classes are held in our corporate facility in Duluth, Georgia, as well as in our Regional Offices in Chicago and Shrewsbury, NJ. Please contact the Software Solutions Education department for a current Education Catalog and class schedule, or visit us on the web at www.sofsol.com.
